Abdelazyz RKHISS

Image and signal processing, deep learning

1 Allée de la Campanelle
Grenoble, France
+33 6 59 57 91 09
abdelazyz.rkhiss@grenoble-inp.fr
abdelazyz-rkhiss-03260520a
Abdelazyz

Education

2023–2026 **Ph.D. : Signal Image Speech Telecoms**, *GIPSA-Lab, Grenoble INP, CIFRE thesis with Engie, In progress.*

2021–2023 **Master's in Business Intelligence and Smart Vision**, *University USMBA*, Fès, *End-of-study internship at ENGIE Green.*

2018–2021 **Bachelor's in Fundamental Mathematics, Computer Science and Applications**, *University FPO*, Ouarzazate, *End-of-study internship in Computer Vision.*

2016–2017 **High School Diploma in Mathematical Sciences**, *Lycée Dadès*, Boumalne.

Communications and Publications

From Simulation to Prediction : Wind Turbine Noise Estimation Using Convolutional Recurrent Neural Networks.
EPJ Web of Conferences, JIAMA 2026.

Impact of environmental data on wind turbine noise level estimation.
Journal of Environmental Science and Agricultural Research (JESAR) A. Rkhiss, et al.

Impact of environmental data on wind turbine noise level estimation.
International Conference on wind turbine noise, Copenhagen, june 2025.

Constructing wind turbine noise spectrograms using deep learning : contribution of environmental data.
Congrès Français d'Acoustique, Paris, April 2025.

Automatic estimation of wind turbine noise with recurrent neural networks.
International Conference Inter-Noise, Nantes, August 2024.

Research Experience

10/2023 – Today **PhD Researcher (CIFRE)**, *GIPSA-Lab & ENGIE Green*, Grenoble
- Dataset building with acoustic wind turbine noise simulations.
- Deep learning for wind turbine noise estimation and spectrogram construction.
- Integration of environmental data to improve acoustic predictions.
- Physical informed NN.
- Signal post-processing with processing technics.
- classification imbalanced and chance level estimation.

03/2023 – 08/2023 **Research Internship**, *ENGIE Green*, Lyon
- Acoustic signal processing.
- Synthesis of wind turbine noise and dataset creation.
- Deep learning model training, evaluation, and visualization.

12/2020 – 06/2021 **End-of-Study Internship**, *FPO*, Ouarzazate
- Introduction to medical imaging, image manipulation and processing.
- Built a convolutional neural network model for classification.

University Projects

Image & signal processing	Mathematics and algorithms for image and signal processing
Matlab GUI	Developed a Matlab application for image processing
Computer Graphics	Created and animated 3D shapes using C
Big Data	Analyzed Tweets using KAFKA, Python, and ELASTICSEARCH
Video Analysis	Object detection methods
Data Mining	Basic mathematical models, data and text mining for natural language processing
Image Mining	Deep Learning models for Medical Image segmentation and detection
Web & Databases	Frontend and backend web development, SQL (MySQL, SQL Server), database design and querying.

Teaching and extracurricular Activities

2026	part-time teacher on "Algorithmic and programming" at the University of Grenoble Alpes
2025	part-time teacher on "Statistics and probability" at the University of Grenoble Alpes
2025	Professor for high school students 'Armé de Salut' Lyon
2024	part-time teacher on "software engineering" at the University of Grenoble Alpes
2023	Member of IAESTE France association
2019	Volunteer at GHIRASS orphanage center : Taught Mathematics, children's animator
2018	Member of ENACTUS Morocco Club : IT Assistant, Member of Management Team

Skills

Mathematics	General math, Probability, Statistics, Analysis & Algebra
Tools & Libraries	Pandas, Numpy, PyTorch, TensorFlow, Scipy, scikit-learn
AI & Machine Learning	K-Means, KNN, SVM, RL, Naïve Bayes, Neural Networks
Business Intelligence	MDX, Pentaho, Microsoft SQL Server
Relational Databases	Oracle Database, SQL
Video Analysis	SIFT, GMM, Yolo, RCNN, basics of Roboflow framework

Languages

Amazigh (native), English (B2 : Cambridge language test), French (fluent), Arabic (fluent)

Interests

Hobbies : Chess, Photography, Football, Swimming
